

Professional & Occupational Licensing

Professional and occupational fields are moving online rapidly, and government agencies must keep pace with a solution and service that matches their expectations. Common professions and occupations included in this type are Nurses, Psychologists, Cosmeticians, Contractors, and Electricians.

With BasicGov®, you can reduce your agency's costs, improve transparency, and give your team more time to better serve with an efficient, modern, and mobile licensing solution.

BasicGov - Empowering Government to Efficiently Serve

A Simple and Efficient View of a Standard Licensing Process

Go Paperless, Go Cloud! BasicGov® provides a cloud offering for a permitting, licensing, inspection, and enforcement solution for the public sector. We help government build trust with citizens and industries by making interactions more efficient around regulatory and compliance-based processes.

BasicGov's Professional and Occupational Licensing solution helps government renew licenses faster, collect licensing revenues on time, improve budgeting, track certifications, and manage cash flow. BasicGov® ensures revenue is maximized due to automation of common everyday tasks related to licensing.

Key Features and Benefits

- Eliminate redundant data entry and maximize resource availability with our configurable online application process, including file submissions versus a manual intake (also supported)
- Simplify the online application process by guiding applicants through each step and checking data against validation rules and mandatory fields
- Accept online payments using the BasicGov® Payment Cart* API
- Provide transparency with our Customer Portal for users to view application status
- Generate license-related documentation and certifications with our built-in Letters Engine and distribute automatically (or manually), as required
- Process and evaluate applications for licensees to practice in a given field

Customers that Trust in BasicGov®

BasicGov® Tools

The solution includes everything a government agency needs to efficiently serve their constituents, from a configurable application framework to a payments engine. The solution is also supported with document generation capability and a GAAP compliant double entry accounting system.

- ✔ **Citizen Portal** online portal for application submission and real-time status on inspections or permits. Efficient interface between citizens, businesses, and agency staff and supervisors.
- ✔ **Payment Cart** allows for multiple item payments across various departments. Supports refunds, payment adjustments, deposits and other accounting processes. *Requires third party payment gateway integration.
- ✔ **Fund Accounting** delivers a centralized toolset to view, input, and manage cash and receivables, corrections and distributions, and accounting reports for double entry accounting systems.
- ✔ **Esri® GIS Connector Tool *GIS Sync*** integrates your existing Esri GIS Server spatial data with BasicGov and allows for continuous data synchronization. ***GIS Map Viewer*** adds visual analysis capabilities and includes map-based tools to create and manage information.
- ✔ **Reports & Dashboards** is a standard platform feature providing enterprise-scalable capability for data analysis. Configure new reports, schedule and run saved reports, create ad-hoc queries, or clone a report. Separates access to data through security profiles, and uses CRM capabilities to distribute reports across your organization.
- ✔ **Inspections** track the inspection lifecycle from permit inspection request through to finalizing; automate the reinspection process for both permits and complaints; and easily generate violation notices.
- ✔ **Dynamic Checklists** allow you to configure checklists (forms) that are dynamically generated. Checklists can be used for license and permit applications, inspections, and other records in BasicGov.
- ✔ **Dynamic Rules Engine (DRE)** provides process automation in a user-friendly format without code or custom System Integrator approaches. The DRE runs entirely on Salesforce® and combines the best features of Salesforce Workflow, Salesforce Process Builder, and Salesforce Triggers into a business-friendly interface.

Salesforce® Platform Advantages

Secure, private, scalable & reliable
The Salesforce® service has been designed to provide customers with trusted privacy with the highest levels of performance, reliability, and security.

Market leadership and continuous innovation

Salesforce® has been frequently named one of the World's Most Innovative Companies by Forbes. Salesforce® is #1 in Enterprise Cloud Computing and #1 in CRM according to IDC.

Ease of use

The Salesforce® Platform offers a core set of technologies that not only powers BasicGov®, but also allows our customers to build custom apps, connect data from any system, and manage it from anywhere.
